# How to use "Yealink CP960" for Dialling

- If "Yealink CP960" is connected to laptop using USB cable, display screen would be as shown below, select "invite" and dial the desired number (as we dial on Cisco phones), then select "invite" to place the call.

- If "Yealink CP960" is NOT connected to laptop, below screen would be displayed, select "Dial" app to place the call.
